EECS 207
Spring 2021

Lecture 22

Project

- Content Based Image Retrieval

- Individual effort—no teams.

- Project report due: Friday, May 14

- No presentation.

- I will provide support code in Python and Matlab but you can work in whatever language/environment you prefer.

- Details to follow.

Lab Section

- Lab section tomorrow, Wed. April 14:
  - **Noon-1:20pm**
- Topics:
  - Answer any questions you have about project so far (data and support code).
  - Demonstrate simple CBIR on bird spectrogram dataset.
  - Go over creating precision-recall curves for evaluation.

Project Webpage

- I have created a simple project webpage:
  - https://faculty.ucmerced.edu/snewsam/EECS207/Project/project.html
- (This is also linked from the course webpage.)
- I will use this project webpage to provide updates, code, data, etc. for your course project.
